

In partnership with NC3, Snap-on was proud to introduce the new 596F multimeter certification during the March 2019 Train the Trainer at TCAT Elizabethton (Elizabethton, TN).

The new 596F multimeter certification includes training on the problem-solving capabilities of Snap-on digital multimeters — the same technology used by professionals in the workplace. Training is focused on subjects from basic applications to advanced troubleshooting.

The EEDM596F is a hand-held True RMS auto ranging DMM. The EEDM596F measures ACV, DCV, ACA, DCA, Resistance, Frequency, Capacitance, Duty Cycle, Diodes, Continuity, Temperature, RPM, Dwell, and millisecond pulse width. It also features Bluetooth® communication for iOS and Android remote reading apps.

This certification provides a widely recognized endorsement of technical expertise and demonstrated achievement. When students successfully complete this Snap-on certification, they obtain one of the most requested skills in the industry today.

#### **COURSE CONTENT INCLUDES:**

- Multimeter controls and operation
- Meter display readings and symbols
- Importance of proper terminal connections
- Basic applications
- Troubleshooting techniques
- Hands-on operation
- Bluetooth Sync and Operation with IOS and Android based phones
- Lab exercises
- Online testing
- Certification PN 596FMETERKIT
