

NC3 and Lincoln Electric Education Partner Schools (LEEPS) Fabrication 1 & 2 Virtual Train-the-Trainer

Event Overview:

Join us December 12 – 15, 2022 for our 4-day virtual training from 2:00 PM – 5:00 PM Eastern Time with NC3, Lincoln Electric, and our Master Trainers!

What is the LEEPS program?

LEEPS is a national program developed by The Lincoln Electric Company. The National Coalition of Certification Centers (NC3) is the certification body of LEEPS <https://www.nc3.net/>. The LEEPS program provides schools with a complete suite of portable, stackable industry-recognized welding certifications. The program involves a Train-the-Trainer initiative.

What is Train-the-Trainer?

This training is not about learning how to weld. This training prepares you (the “Trainer”) to train others. Upon completion of this training, you will be a certified NC3 trainer who provides standardized, world-class welding training at your organization. You will experience the curriculum, assessments, and exams first-hand before implementing this program in your own classroom.

Which certifications will I be able to issue?

LEEPS Members Only:

- Fabrication 1
- Fabrication 2

**Attendees will have access to instructor materials after completing the training only by becoming full LEEPS members. Anyone may attend the training for professional development purposes.*

Cost: The training cost is \$595 and will be invoiced within 10 business days.
